Could a lost wiki be reopened?

Ticket details

1 day ago

General question here. No requests.

I was wondering if hypothetically I found a link to a fandom wiki (then wikia) from 2014, the year it closed, could I get it reopened 11 years later? Do you retain the data? Same scenario for a wiki closed a year ago?

I am asking b/c I really think a closed wiki should never be re-opened or recreated, so I want a clarification.

Thank you.

If a wiki was closed in 2014 and was not reopened since then it is unlikely we would have any information on it and we wouldn't be able to reopen it.

What about from last year?

Kimberton

If you have a link to the wiki I can look it up.

I don't see a record of that wiki in our system.
